Response to Amendment

a. Claims 1-29 rejected under 35 U.S.C. 103(a) as being unpatentable over Kott et al (6,306,817) is withdrawn in view of applicant's 103(c) statement.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 30-42, 45-49 are rejected under 35 U.S.C. 102(e) as being anticipated by Scheibel et al (6,274,540).

Sheibel et al disclose a detergent composition comprising 0l1 to 99.99% by weight of an alkylaryl sulfonate surfactant system of formula I and up to 99.99% by weight of adjunct ingredients (see abstract, columns 4-7).

As this reference teaches all of the instantly required it is considered anticipatory.

Art Unit: 1751

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 7. Claims 30-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO (99/05243) in view of Vinson et al (6,365,561).

Ų

Application/Control Number: 09/889,632

Art Unit: 1751

WO '243 disclose a detergent composition comprising a crystallinity disrupted alkylaryl sulfonate of formula I; and adjunct materials such as soil release agents and antiredeposition agents.

WO '243 lack applicant's specific diamine.

Vinson et al disclose a detergent composition comprising anionic surfactants such as alkyl benzene sulfonates and diamines (col. 4-7).

It would have been obvious to one of ordinary skill in the art to include the diamines of Vinson et al to the compositions of WO '243 because Vinson et al teach that said diamines are effective as grease removal agents (col. 4, lines 50-65) and WO '243 includes grease or soil release agents. Therefore, one of ordinary skill in the art would have been motivated to include the diamines for the purpose of removing grease or soil in the compositions of WO '243 in a beneficial or synergistic manner.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Necholus Ogden whose telephone number is 703-308-3732. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra N. Gupta can be reached on 703-308-4708. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-3599 for regular communications and 703-305-3599 for After Final communications.

Application/Control Number: 09/889,632

Art Unit: 1751

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
